

Improve patient care with our unique color bands.

The Wristband for the 21st Century

Confirming patient identity is essential to maintaining a safe point of care environment, which is why bioPoint™ Patient Identification from Bio-Optronics, utilizes color photographs to ensure that patients and their treatment are always perfectly synchronized. bioPoint™ PI doesn't stop at high-quality wristbands either; it simultaneously generates chart, specimen and medication labels, providing one powerful solution for many diverse needs. Improved patient safety and time-saving methods in an affordable enterprise-wide solution? Absolutely—at Bio-Optronics we work hard to deliver cost-effective and powerful health care technology.

Benefits

- ▶ **Patient Wristbands**
All label identification needs in one complete software solution: labels (chart, phlebotomy, specimen, medication, asset and equipment), patient wristbands, and staff/visitor identification
- ▶ **Unbeatable Usability**
Users can master bioPoint™ PI in a matter of minutes
- ▶ **Adopted by VA Hospitals**
Due to proven benefits in advancing patient safety
- ▶ **Easy Integration**
Uses HL7 in addition to traditional interface methods to integrate with hospital enterprise systems or pharmacy systems
- ▶ **VistA Compatible**
Interfaces directly to VistA for patient demographics, allergy information and all images in VistA imaging
- ▶ **Library of Common Forms**
A comprehensive library of Avery, LaserBand, EndurID and custom forms, providing an unlimited variety of templates for all of your identification needs
- ▶ **Handheld Module for Care at the Bedside**
Point-of-care (handheld) phlebotomy/specimen label module ensures optimal patient safety and care at the bedside
- ▶ **Hospital Security**
Captures electronic signatures, fingerprints and photographs for securing visitors and staff in the hospital environment
- ▶ **Reporting**
Provides complete audit trail and history of all staff actions within the application
